13. Design Thinking 设计思维课程

For the last few years, companies across the world have been obsessing over 'design thinking' to solve complex problems. Design thinking, as the name suggests, derives its basic principles from the discipline of design. Unlike most previous problem-solving approaches, it is human-centric, collaborative and driven by experimentation.

Design Thinking 设计思维课程由加州大学伯克利分校 HAAS 商学院提供。课程中学生将分组研究课题，利用课堂所学的设计思维理念提出解决实际问题的思路。课程由商学院教授、Berkeley Innovation Group 联合创始人 Clark Kellogg 讲授，并有数名教学助理一同参与学生的学习和讨论环节，高达 1:10 的师生比可以让学生们与老师充分交流。
